Bazaar - Bug #2954
Do not host empty repos

02/12/2014 11:58 pm - pd0x

Status:	Closed		Start date:	02/12/2014
Priority:	Normal		Due date:	
Assignee:	hans		% Done:	0%
Category:			Estimated time:	0.00 hour
Target version:	swap repos with Bluetooth and Bonjour			
Component:				

Description

You can currently enable the webserver when there are no APKS and no index in the repo yet. This happens when the app is first installed and no applications have yet been included into the repo.

Either the workflow UX should change to not display the webserver control button until appropriate or the button should display indication that the user needs to create a repo before turning the webserver on.

create initial repo with only FDroid in it

This automatically creates a repo with only FDroid in it the first time the user goes to the Local Repo view. Having an empty repo is useless if the user is trying to swap with someone. Having FDroid in there is not a privacy leak since FDroid is needed for the swap process, and it will then enable people to automatically get updates from each other, and do the bootstrap process from the web browser.

fixes #2954 https://dev.guardianproject.info/issues/2954

History

#1 - 02/12/2014 11:58 pm - pd0x

- Target version changed from 0.1 - "Kerplapp" to 0.2 - ChatSecure/Bluetooth
